Funny riddles with answers dirty

PhotoDuets/ShutterstockRiddles keep the gamut from simple and easy to deal with to serious brain busters – and we’ve muddled several of the latter for your mocking pleasure. The main head scratchers on this list may need a lot of brain power to save them – but it feels really great when you find it! And if you stumped, check out our 25 favorite puzzles for kids instead. Getty Images, rd.com I speak without my mouth and I hear no ears. I don't have a body, but I come back to life with the wind. What am I? This puzzle relies on me to put you in the mind of your ears and mouth. You get a little hint of the wind to encourage you to think broadly and avoid the literal. Answer: Echo. If you have an eye-catching eye, try to solve these intricate rebus puzzles. Getty Images, rd.com my life in hours and I serve you at the end of the day. I'm fast when I'm thin and slow when I'm fat. The wind is my enemy. Hard riddles want to twist you, and this one works by hitting you with details from every angle. A big tip comes at the end with the wind. What's most threatening about the wind? You have to stretch your brain to make something tiny and unexpected. Answer: smajla. In addition, check out some simple puzzles (with answers) that are not too challenging to solve. Getty Images, rd.comI have sites, but no houses. I have mountains, but no trees. I've got water, but no fish. What am I? This puzzle aims to confuse you and focus you on the things that are missing: houses, trees, and fish. You might have to think about something inanimate. Answer: Map of Getty Images, rd.comWhat can be seen in mid-March and April that can not be seen at the beginning or end of not a single month? This puzzle works by trying to get you into thinking about the weather or holidays or other calendar-related events. To get this right, you need to actually get a super literal. Answer: the letter R. Like aliases like these? Try these tricky word puzzles that will leave you stumped. Getty Images, rd.com a boat full of people. It didn't sink, but when you look again, you don't see a single person on board. For? Hard puzzles, like this brainteaser, are complicated because they seem to invite straight, logical thinking. You can get answers as they all went below deck or jumped overboard. But you have to focus on the word single and think about her other meanings. Answer: All the people were married. Can you solve these complicated puzzles in the shadows? Getty Images, rd.comWhat the word in English does the following: the first two letters mean male, the first three letters mean a woman, the first four letters mean a lot, while the whole word means a great woman. What's a word? It's hard because it lets you think about gender and the ways in which they're different. You have to think of one word that holds the other. It's easy when you think about it! Answer: Heroine Getty Images, rd.com This one is pretty impossible, but use the facts you know about English to get in the way. First, think of the words with double vowels. And you have to know that it's probably going to be a made-up word. The first and last letters of these combined words will form one set of double letters. Now break your brains out! Answer: Bookkeeper. For another complex word test, see if you can find out if these funny words are true or invent them. Getty Images, rd.comA woman shoots her husband and then holds him underwater for five minutes. Then hang him. They enjoy a wonderful dinner immediately afterwards. Commented. This riddle is trying to throw you off balance with shock. But pay attention to the first verb, shoot. What can you shoot next to a gun? There's the key to everything. Answer: She took a picture of it and developed it in her dark room. Can you find the missing number in this puzzle? Getty Images, rd.com come from a mine and always surround themselves with wood. Everybody's using me. What am I? The idea of a mine could lead you to coal or diamond. Wood detail is your best clue. This riddle is a fortress, but wood can lead you to find out. Answer: Pencil pencil leads Getty Images, rd.comA girl has as many brothers as sisters, but each brother has only half as many brothers as sisters. How many brothers and sisters are in the family? This trick question gives you a bunch of ways to be completely confused if you try to figure out the answer. The key is to keep it simple. Make sure your sisters and brothers are together and in terms of your own number of siblings. Then the answer gets a little lighter. Answer: Four sisters and three brothers, yes, he had a little math. If there was no sweat, try these other mathematical puzzles that only the brightest can ever see. Getty Images, rd.comWhat disappears as soon as you say his name? Hard puzzles like this require you to think logically or straight. At the same time, it uses a conceptual metaphor with the notion that something is disappearing. The answer seems so simple – but not until you find out! Before that moment, your brain was twisted. Answer: Silence Getty Images, rd.comWhat can the number four half out of five? You may start doing some elaborate fractions, but hard puzzles like this are sometimes much more about the word game than try numbers. Think literally, and the answer can appear before your eyes. Answer: IV, roman number for four, which is half (two letters) of the word five. Take this quiz to see if you're a genius. Getty Images, rd.com I have the keys, but no locks and space, and no room. You can come in, but you can't get out. What am I? It deceives you by thinking about a place that can be entered. Then you merge with a place without a place where you can't leave. They might even hang you on the keys. You should've got a drag on there. Think of that word. What are the other meaning Don't that require locks? Answer: Getty Images keyboard, rd.comWhat is it like to use it during drying? This has a simple answer, although it stills most people trying to figure it out. I feel like they always have to be the opposite so you can get wet. Think of an object that can, ahem (hint!) absorb or be both. Answer: Towel. Can you can use their fingerprints to see these animals? Getty Images, rd.comWhat are many letters in the alphabe? Some hard puzzles pull you by sending you the easiest answer first. You can have this, can't you? 26 - if you speak the English alphabet. Not so fast. Take another look and be very simple and simple. Answer: There are 11 letters in the words of the alphabet Getty Images, rd.comA's brother B.B is brother C.C is father D. So how is D connected to A? Puzzles try to send your train of thought off in scattered directions. Try to stay clear and just follow the logic. Using letters as pens for names like Uncle Bob or Aunt Linda makes simple relationships seem difficult. Answer: A is D's uncle. Here are more brain teasers that will leave you stumped. Getty Images, rd.comWhat are the following three letters in this combination? OTFFSS This super hard question asks you to determine the ratio of letters. They seem random: a vowel, two consonators from the tail of the alphabet, two from the front, then two more. What could it mean? What's the pattern? In this case, think of common strings of words to get you closer. But it still seems almost impossible to hit on the solution. Answer: E N T (Each letter represents the first letter in written numbers: One, two, three, four, five, etc.). Getty Images, rd.comTho belongs to you, but everyone else uses it. The key to this puzzle is to think of something other than the actual subject. Use your critical thinking skills to get conceptual about it. Answer: Your name. Can you figure out these tricky detective riddles? Getty Images, rd.comAu, think of the color of the clouds. Then think of the color of the snow. Think of the color of a bright full moon. What do cows drink? Some puzzles work by your brain to go through a series of associations so you're locked in and can't think of alternatives. Be careful with this puzzle. Does the question really have to do with that color, what were you thinking? Most people say that cows drink milk because they are attached to white paint. Answer: Getty Images Water, rd.comWhat is seven different from the remaining numbers between one and ten? Mathematical nerds can start thinking about prime numbers or there are seven diligent with this or if they can pick up and all that. Avoid thinking about math and think about the literal quality of words that mean numbers. Remember that puzzles play with differences between literal and conceptual, or simple and complex. For this puzzle, simple, but rotate into a paradigm separate from the numbers. Answer: Seven has two syllables, the other numbers have only one syllable. Here are some brain games that can help you get smarter. Getty Images, rd.comAo, when you eat me, then they eat you. What am I? Hard puzzles get you used to think about metaphors and concepts. Not this one. keep it simple and literal to come up with a solution. But ask yourself who or what is you. Answer: Fishhook Getty Images, rd.comWhat comes once in a minute, twice in a moment, but never in a thousand years? Again, puzzles like this often make you sh entries and stretching your brain cells thinking all about time and how it works. By now, you may have found that puzzle numbers rarely include math. Answer: M. These are the strangest unsolved mysteries of all time. Getty Images, rd.comWhat is the word in the dictionary always misspelled? Hard puzzles are obsessing with word play and word play. This one has such an easy answer that it expires by dragging you to your mind in a complicated way. Some puzzles require that. Not this one. Answer: Incorrectly Getty Images, rd.comWhat can you hold in your right hand, but never in your left hand? Easy and slow with that. If you look at your hands, it could give you a clue based on logic. Answer: Your left hand. Can you solve this famous riddle that Einstein was supposed to create? Getty Images, rd.comWhat can you physically stand behind your father while he's behind you? For this kind of super complicated puzzle, you might be best to actually map the physical relationship in your head – if you can! This puzzle works by ing you into thinking of inability. Answer: You're standing in the back with your dad. Then take a look at the most famous puzzles in history. Originally published as December 02, 2019
